Building IoT Infrastructure  
in Tanzania

Jeremy Mwanga 20

## Problem

IoT adoption in Africa is slow due to lack of affordable, interoperable platforms for device integration and control.

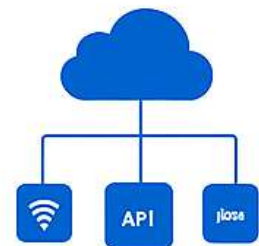

## Solution

A unified IoT platform with MQTT and RESTful device communication, supporting MQTT, FULB, gateways and API access for developers.

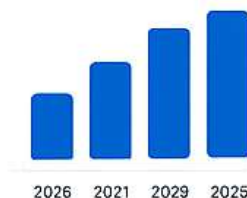

## Product Overview

Targeting the growing IoT market in Tanzania with a plan for expansion across Africa.

## Business Model

Subscriptions  
API Licensing  
Hardware

## Traction & Milestones

- ✓ Pilot projects with agricultural, healthcare, and utility companies
- ✓ Partnerships with local tech firms
- ✓ Prototyping of the IoT platform deployed in real-world scenarios

## Team

Jeremy Mwanga  
CEO

Aisha Mwakalinga  
CTO

## Financials / Ask
